PROFILE

Full-Stack Software Engineer building **production-ready SaaS products** on the **MERN stack** with real auth, databases, and users from day one. I go beyond AI as a buzzword, **integrating LLMs** directly into core product features like resume intelligence and automated reporting to make AI something users actually rely on. I own features end-to-end **schema design, REST APIs, JWT auth, and polished UIs** backed by strong fundamentals in data structures.

EDUCATION

Bachelor of Engineering – Electronics & Telecommunication (ENTC)

SSBT College of Engineering & Technology

2023 – 2026

Jalgaon, India

EXPERIENCE

Internship Trainee

Hitachi Astemo India Pvt. Ltd.

Jun 2024 – Jul 2024

Jalgaon, India

- ▶ Assisted in **identifying and diagnosing technical issues** across industrial systems by applying structured, root-cause problem-solving – the same analytical approach now used to debug full-stack applications.
- ▶ Recognized for **sincerity, adaptability, and quick learning ability** while collaborating with cross-functional teams, building a strong foundation in disciplined, process-driven engineering.
- ▶ Documented recurring issues and process observations for the team, developing an early habit of **clear technical communication** that now carries over into writing maintainable code and project documentation.

TECHNICAL SKILLS

Languages	JavaScript, Python
Frontend	React.js, HTML5, CSS3, Responsive & Component-Driven UI, Chart.js
Backend & APIs	Node.js, Express.js, RESTful API Design, JWT Authentication & Protected Routing
Database	MongoDB (Schema Design & Aggregation Pipelines), SQL
AI Tools & Integration	Gemini AI API, LLM-Powered Features, Prompt Engineering, AI-Guided Workflows, Automated Insight Generation
Automation & Docs	Puppeteer (PDF/Report Generation), ATS-Friendly Document Automation
Core Engineering	Modular & Scalable API Design, Data Structures & Algorithms
Tools & Versioning	VS Code, Git, GitHub, Postman

PROJECTS

CareerPilot – AI-Powered Job Management

- ▶ Designed and shipped an **end-to-end SaaS platform** that replaces scattered spreadsheets and browser tabs with a single system for job applications, interview pipelines, and career prep built on **secure JWT authentication, protected routing**, and real-time application-status tracking for genuine multi-user use.
- ▶ Turned a static job tracker into an **AI career coach** by integrating **Gemini AI** for resume critique, job-description matching, skill-gap analysis, and mock interview prep, then automated the tedious part with a **Puppeteer-powered ATS-optimized PDF export pipeline**, backed by a modular MongoDB schema that decouples AI services from core business logic.

Personal Finance Platform – Expense & Financial Analytics

- ▶ Built a **full-stack finance platform** that goes beyond basic expense logging – handling budgets, recurring transactions, savings goals, and category-based tracking behind **secure JWT authentication**, giving users one reliable source of truth for their money.
- ▶ Turned raw transaction data into decisions with **interactive Chart.js dashboards** for spending trends, burn rate, and budget utilization, layered with **AI-generated financial insights**, while engineering the backend for scale using **MongoDB aggregation pipelines** and clean RESTful API design.

SevaDesk – AI-Guided Government Service Assistant

- ▶ Solved a real everyday friction point by building a **single-interface platform** for PAN Card, Aadhaar, Passport, and Driving Licence applications, replacing multiple confusing government portals with one guided experience powered by an **AI-guided conversational workflow** that translates jargon-heavy requirements into plain language.
- ▶ Paired the platform with a **unique-ID tracking system** for real-time status visibility across every service, and architected the frontend as a **reusable, modular component system** so onboarding a new government service takes minimal new code a deliberate choice for long-term maintainability.

ACHIEVEMENTS & CERTIFICATES

- ▶ Built and shipped **three production-grade full-stack SaaS applications** spanning career-tech, fintech analytics, and government-service automation each with real authentication, databases, and live AI integrations.
- ▶ Completed **Web Development** certification from *Apna College* – covering full-stack fundamentals including HTML, CSS, JavaScript, React, Node.js, and backend API design.
- ▶ Consistently delivers **end-to-end ownership** of features from database schema and REST API design to polished, data-driven frontend experiences.
